CLAIMS

WHAT IS CLAIMED IS:

A genetically engineered mammalian cell that has been 5 mutated by a process comprising the insertion of a recombinantly manipulated polynucleotide sequence into a gene in said genetically engineered mammalian cell wherein said gene is identifiable as corresponding to at least one of SEQ ID NOS: 1-891.

10

- The genetically engineered mammalian cell of Claim 1, wherein said cell is murine.
- A cell according to Claim 2, wherein said cell is an embryonic stem cell.
- The genetically engineered mammalian cell of Claim 1, wherein said polynucleotide sequence is present on a viral vector.

A cell according to Claim 4, wherein said viral vector is a retroviral vector.

- A cell according to Claim 4, wherein said viral vector 25 additionally comprises regions of targeting DNA that facilitate gene targeting by homologous recombination.
 - 7. An isolated murine embryonic stem cell line comprising an engineered retroviral gene trap vector in at least one gene comprising a polynucleotide sequence first disclosed in one of SEO ID NOS: 1-891.
